Chinmay CP

Full Stack Web Developer

chinmaycp13@gmail.com
Mysore, Karnataka, India
github.com/chinmay-sys
linkedin.com/in/chinmay-cp

SUMMARY

Full-stack developer specializing in building performant and scalable web applications. Proficient in JavaScript, Python, and modern frameworks. I write clean, efficient code and design user interfaces that prioritize usability, speed, and real-world impact. Experienced with REST APIs, AI integration, and deploying production applications on Vercel.

EDUCATION

Maharaja Institute of Technology Mysore 2024 — Present

B.E. in Computer Science & Engineering · USN: 4MH24CS404

TECHNICAL SKILLS

JavaScript (ES6+) · TypeScript · Python · Java · C · HTML5 / CSS3 · Node.js · Express.js · React · Tailwind CSS · Streamlit · REST APIs · Git & GitHub · Vercel · Vite · Machine Learning · Gemini API · Prompt Engineering

PROJECTS

Pathfinder Refine TypeScript · React · Tailwind · Vite

Interactive pathfinding algorithm visualizer with real-time animated traversal.

- Implemented BFS, DFS, Dijkstra, and A* with step-by-step grid animation
- Built interactive grid with wall drawing and configurable start/end points
- Deployed on Vercel with full responsive design using shadcn-ui components

pathfinder-refine.vercel.app ↗

Gemini AI Study Partner Python · Gemini API · Streamlit

AI-powered study companion that tutors on any subject using Google's Gemini.

- Integrated Google Gemini API for conversational tutoring and concept explanations
- Built with Streamlit for interactive, real-time chat UI
- Deployed as a serverless Python function on Vercel

gemini-ai-study-partner.vercel.app ↗

ATS Checker

HTML · JavaScript · Vercel

Client-side resume analyzer that scores ATS compatibility against job descriptions.

- Analyzes keyword overlap and identifies missing skills with scoring engine
- 100% client-side — no data leaves the browser for full privacy
- Deployed on Vercel with zero backend dependencies

ats-checker-navy-chi.vercel.app ↗

Weather App

JavaScript · OpenWeather API · CSS3

Real-time weather dashboard with city search, 5-day forecast, and smart caching.

- Fetches live weather data via OpenWeather API with error handling
- Displays temperature, humidity, wind speed, and visual forecast icons
- LocalStorage caching layer to reduce API calls and improve performance
