

CHINMAY CP

FULL STACK DEVELOPER

chinmaycp13@gmail.com | Mysore, Karnataka, India | github.com/chinmay-sys | linkedin.com/in/chinmay-cp

SUMMARY

Computer Science engineering student focused on full-stack web development using React.js, TypeScript, Node.js, Express.js, and REST APIs. Built database-driven applications and interactive visualization tools with experience in PostgreSQL, API integration, Git/GitHub version control, and Vercel deployment workflows.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, SQL, C
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Vite, Recharts
Backend	Node.js, Express.js, REST APIs, FastAPI
Databases	PostgreSQL, MongoDB, Supabase, SQLite, SQLAlchemy ORM
AI / APIs	Gemini API, OpenAI API, LangGraph, Vector Search (Qdrant)
Tools & Deployment	Git, GitHub, Docker, Vercel, Postman

PROJECTS

RetailMind

[GitHub ↗](#)

Technologies: React 18, TypeScript, FastAPI (Python), PostgreSQL, SQLAlchemy, LangGraph, Qdrant Vector DB, Tailwind CSS

- Designed and implemented RESTful backend APIs using Python FastAPI, PostgreSQL, and SQLAlchemy ORM for an agentic retail decision platform featuring multi-agent workflow orchestration.
- Integrated Qdrant vector database for RAG business chat retrieval alongside an ensemble time-series machine learning model (Prophet + XGBoost) for 30-day demand predictions.
- Built interactive analytics dashboards with React 18, TypeScript, Recharts, and Tailwind CSS, implementing OAuth2 + JWT authentication and a Human-in-the-Loop decision review pipeline.

DevForge AI

[GitHub ↗](#)

Technologies: React, TypeScript, Node.js, Express.js, PostgreSQL, Docker, OpenAI API, JWT, Tailwind CSS

- Developed full-stack REST APIs and role-based authentication using Node.js, Express.js, React, JWT, bcrypt password hashing, and Zod input validation for student, recruiter, and admin portals.
- Designed relational PostgreSQL database schemas and configured Docker containerized database hosting to manage student candidate profiles, job application pipelines, and admin usage telemetry.
- Integrated OpenAI API with pdf-parse middleware to engineer automated resume impact scoring, job-candidate compatibility matching algorithms, technical assessment quizzes, and mock interview feedback.

Pathfinder Refine

[Live Demo ↗](#) | [GitHub ↗](#)

Technologies: React, TypeScript, Tailwind CSS, Vite, Vercel

- Built an interactive pathfinding visualizer in React and TypeScript supporting Breadth-First Search (BFS), Depth-First Search (DFS), Dijkstra's Algorithm, and A* Search Algorithm.
- Developed an interactive grid system enabling dynamic wall placement, configurable start/end node positions, and real-time step-by-step animated algorithm traversal.
- Implemented responsive UI components using Tailwind CSS and Vite, and deployed the production application on Vercel.

EDUCATION

Bachelor of Engineering in Computer Science & Engineering

2024 – 2027

Maharaja Institute of Technology Mysore, Karnataka
